The screenshot shows the MBTA website page for "Natick Center Station Accessibility Improvements". The page features a header with the MBTA logo and navigation links. Below the header is a main heading "Natick Center Station Accessibility Improvements" and a large photograph of the station platform. To the right of the photo is a blue box titled "Building a Better T" with text about the \$8 billion investment plan. Below the photo is a paragraph stating that the station ranks in the top 25% of busiest stations and is being renovated for accessibility. A list of project details includes: Contract awarded: November 2019, Projected Completion: 2022, Budget: \$36.2 million, and Status: Construction. There is also a dropdown menu for "Project features" and a section for "Rider Benefits".

The graphic features a photograph of the station's exterior with construction equipment. Below the photo is the title "Natick Center Station: Overnight Weekend Construction Work". Two text boxes provide details: "The MBTA has started making accessibility improvements at the Natick Center Station, which includes the installation of 2 new elevators, 2 accessible ramps, 6 stairways, a" and "The community can expect significant noise from truck traffic, heavy on track machinery, with generators and running light towers in use during this overnight work."
